PROFILE

I am an ambitious and enthusiastic pursuing Post Graduation seeking a position with a reputable company to utilize relevant skills and knowledge gained from academic coursework and my previous company. I am eager to contribute to the company's success while also embracing opportunities for ongoing learning and professional development.

WORK EXPERIENCE

Web Developer

AD SOFTEX (INDIA) PVT. LTD.   2022 – Present

- Currently I'm working in a back office which is handling all the work of Keller Williams Cornerstone Realty which is US bases Real Estate Brokerage Firm.

- My work is to manage multiple websites of the company and update it on timely manner. Updation includes creating new web pages, add or remove associates details from the website. Update the information on database.

- kw–nj.com this is developed on WordPress and PHP, my work is to update the information on the website.

- cjrei.com this is real estate institute website on which I update the course details, handles payments of the courses and students registrations.

- I'm also working on a CRM (KW Command) in which I have to create new website for every individual associates of the company and add them into the system.

PROJECTS

WEBSITES

- Developed and launched multiple websites for local shops, coaching institutes, and personal blogs, enhancing their online presence and visibility.
- Provided ongoing maintenance and support to ensure optimal performance and functionality.

1. PSS Institute

- This is a computer coaching Institutes Website that I have created with BootStrap framework and customize it manually with HTML, CSS, JS and PHP.
- This website presenting institute's informations and services that they provides. I have created Admin login Panel to manage the students registrations and then print it in a PDF for record it also generate automatically unique enrollment number, certificate generation, edit the students entry details within the table.
- Students also can verify their certificate using their enrollment number once they will pass from the Institute.
- There is query form so that any visitor can reach to the owner easily and also can connect directly on WhatsApp by clicking on the WhatsApp button.

2. shopick.shop

- This is a e-commerce shoping website that I have developed with Wordpress, woo-commerce and PHP.
- This website includes product categories, product cart, wishlist and easy navigation panel.
- I have integrated razorpay payment gateway that provides the service to pay using UPI, credit cards, debit cards and Internet banking.
- I have used plugin for Login and Sign Up before purchasing the product to track it within the unique account.

3. RBM Group of Company

- This is a computer institute's website that I have created with HTML, CSS, JS and php.
- This is one of my initial projects.
- This website presenting the information about the institute and course structure that they provides.
- There is a contact page that provide the location information and contact information along with that it has a query form so that anyone can reach out to the institute for more information.

4. rishabhkushwaha.in

- This is my personal portfolio website that I have created using Bootstrap, HTML, CSS, JS and PHP.
- It provides all the information about my project works, and the services that I provides.
